Assembly and Use Instructions

The KING MB600 Portable Satellite TV Antenna Temporary Vehicle Mount allows you to mount your KING satellite TV antenna* to the roll-down window of long-haul trucks or to the side of an RV. The MB600 bracket easily attaches to the existing handle of the KING satellite antenna, then clips over the top edge of your vehicle's side window. The MB600 is formed of rugged weather-resistant materials, won't scratch the window due to included adhesive rubber pads, and will hold the KING antenna firmly in place when the vehicle is parked (not for use when in motion). Made in the USA.

- Holds KING satellite antenna securely on vehicle's roll-down window
- Mounting plates (included) allow for temporary mounting to the side of an RV when parked
- Adhesive rubber bumpers included to protect vehicle finish
- For use when parked only; not for in-motion use
- For temporary mounting purposes only

KING™ Simply better, by design.™
