# Wheel Stud Service Kit

10611

**TIGER  
TOOL**

Have What It Takes

## Operating Instructions

### Wheel Stud Removal

- 1 Install the appropriate stud removal adaptor into the opposing end of the C-frame. **Figure A**
- 2 Position the 10611 over the wheel stud and apply pneumatic pressure until the wheel stud is released from the hub flange. **Figure B**

### Wheel Stud Installation

- 1 Insert the installation adaptor into the opposing C-frame. **Figure C**
- 2 For installation of  $\frac{3}{4}$ " or 22 mm studs you must select the appropriate aluminum sleeve and place it over the protruding threaded area of the stud. **Figure D**  
  
Place the installation tube housing over the aluminum installation sleeve. The aluminum sleeve is not required on  $1\frac{1}{8}$ " studs.
- 3 Position the tool over the wheel stud installation tube and continue to apply pneumatic pressure until the stud is securely seated into the hub flange.

Here at Tiger Tool, your satisfaction is our number one priority. Should you have any questions about this or any of our products, please call us at 1.800.661.4661.
